

Senior Specialist Operations

Job description

Job Description:

In your new role you will:

- Provide our largest customers with the latest prototypes - depending on their specific needs
- Support market entry, accompany new product launches and, in particular, advance the market push pull strategy
- Order the samples, check the stocks regularly and keep them up-to-date and complete. To do this, you work with SAP to ensure timely and efficient sampling to the customer
- Prepare data, e.g. on stocks, and present it in business meetings
- You will work together with colleagues from Research & Development, Marketing, Sales and Production in a team across several locations

Profile

Job Specification:

You successfully meet the requirements if you have:

- A degree with a technical focus - e.g. supply chain management, industrial engineering, IT, business administration or a similar course of study
- Alternatively, you have already been working in Sample Management or Supply Chain Management for some time
- Gained initial insights into an industrial company, for example through internships
- A high level of interest in project management
- Very good communication skills
- Good IT skills such as programming, databases, data analysis and data preparation
- A good knowledge of Excel as well as a good handling of PowerPoint
