

Intern - Application Engineer

Job description

Junior, senior or in Master's program in electrical engineering. RF/communications focused is preferred. Needs to be available full time in the summer and part time during the school year.

In your new role you will:

- With a pure digital **CMOS approach** and performance, Broadcom's Bluetooth® chipsets and system solutions provide the technology to make wireless personal area networking a reality. Providing radio frequency, baseband, system and complete software support to OEMs and system integrators, Broadcom's Bluetooth chips enable the wireless sharing of data among scores of electronic devices, from mobile phones and wireless stereo headsets to **PDA**s and automobiles.
- Responsible for handling Sales order **sample request** including HW verification and tests.
- Participate in **HW initial** bring up and debugging activities for both internal and customer design.
- Responsible for **BT BQB** and **FCC** related tests.
- Duplicating customer HW issues and creating a report.
- **Sys Ops support** with prototype builds including the part kitting.
- Support **CIS** library part release process.
- Support **HW** rework such as replacing components or swapping the chips.

Profile

You are best equipped for this task if you have:

- Junior, senior or in Master's program in **Electrical Engineering**.
- **RF/communications** focused is preferred.
- Needs to be available full time in the summer and part time during the **school year**.

future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Cypress Semiconductor Corporation is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, childbirth, or related medical conditions), gender identity, national origin, ancestry, citizenship, age, physical or mental disability, legally protected medical condition, family care status, military or veteran status, marital status, domestic partner status, sexual orientation, or any other basis protected by local, state, or federal laws. Applicants with questions about access or requiring a reasonable accommodation for any part of the application or hiring process should contact the Talent Network by phone at (408) 503-2194.

Employment at Infineon is contingent upon proof of your legal right to work in the United States under applicable law, verification of satisfactory references and successful completion of a background check and drug test, and signing all your onboarding documents .

In some instances, if applicable, U.S. export control laws require that Infineon obtain a U.S. government export license prior to releasing technologies to certain persons. This offer is contingent upon Infineon's ability to satisfy these export control laws as related to your employment and anticipated job activities. The decision whether or not to submit and/or pursue an export license to satisfy this contingency, if applicable, shall be at Infineon's sole discretion.

IMPORTANT NOTICE:

Infineon is requiring all new U.S. employees and contractors to be fully vaccinated against COVID-19. Full vaccination is defined as two weeks after both doses of a two-dose vaccine or two weeks since a single-dose vaccine has been administered. Anyone unable to be vaccinated, either because of a sincerely held religious belief or a medical condition or disability that prevents them from being vaccinated, can request a reasonable accommodation.

Infineon Technologies takes data privacy and identity theft very seriously. As such, we do not request personally-identifiable information (PII) from applicants over the internet or electronically. Please kindly refrain from disclosing your PII electronically during the application process or to unauthorized websites that may purport to be Infineon or any of our affiliates.
