

Reliability Engineer - Product Testing (f/m/div)*

Job description

Do you only feel satisfied when quality is at its highest standards? Do you strive for working on the front end of the process, being challenged every day and performing high-level responsibility tasks? Are you ready to work in a dynamic multicultural environment? Then we have the perfect challenge for you! Join us in Cegléd as our new Reliability Engineer - Product Testing and meet all the necessary conditions to be successful!

As a Reliability Engineer - Product Testing, you will play an active role in ensuring high-quality standards and continuous efficiency and improvement. You will keep regular communication with equipment suppliers and coordinate ordering and installation activities of machines, with a proactive and flexible mindset. You will analyze complex situations and different information in order to find precise and reliable solutions. Additionally, you will act as a team-player, being in close contact with your team and other departments, making use of your strong communication skills which will be your ally in the discussion of quality matters.

In your new role you will also:

- **Support engineering team with machine investment planning, procurement activities and installations;**
- **Support lab technicians** and assistants in the daily activities;
- Regularly **check the machines and perform calibrations, verifications and repairs** for minimum downtime;
- **Contribute to in-house calibration activities** for lab machines;
- **Liaising with technical staff** to overcome all technical issues, monitoring of stress test performance;
- **Managing the deviations** as primary contact & support;
- **Support planning team** with relevant information about the machine unavailability, helping them to ensure the maximum capacity of the machines;
- Ability to **troubleshoot device failures** and update to **enhance stress test flows or hardware set-up** if required;
- **Ensure all the documentation** regarding technical specifications and work instructions;
- Participate in **lab related projects** (e.g. Documentation of project inputs /outputs).
