

Senior Specialist Functional Cost Controlling (f/m /div)*

Job description

You love to generate value with your ideas and solutions, work in multi-cultural and cross-functional teams, and are hands-on? You act in an entrepreneurial, results-oriented and cost-conscious manner? You also have high quality standards and continuously strive for improvement? As Senior Specialist Functional Cost Controlling for our Business Line Automotive Power Integration & Supply (PS) you can expect a great interdisciplinary and international challenge where you will get a comprehensive insight into our business from sales to earnings.

In your new role you will:

- **Support the financial consolidation of the global Business Line Automotive Power Integration & Supply R&D activities** and related cost
- **Create and further develop the R&D reporting** in cost categories and projects
- **Develop and support analysis and reporting of R&D financial data** of the global Business Line Automotive Power Integration & Supply to **provide transparent information for management decisions**
- **Contribute to the monthly and quarterly forecast and analysis of PS R&D expenses and projects**
- **Take part at the month end closing activities including correct cost charging in the context of activity based costing**
- **Define and develop key performance indicators for R&D projects with respect to cost and project performance**
- **Drive the strategic planning process of R&D projects within the Business line, the Product lines and for the whole R&D organization of PS**

Profile

You are best equipped for this task if you have:

- A University degree **in Accounting, Business Administration, Controlling, Economics or equivalent**
- At least **1-3 years professional experience in the area of Finance, Controlling or Accounting ideally in a financial audit company**
- **Interest in finance, controlling and information technologies** in a high-tech environment
