

Senior Project Manager Technology Development (f/m/div)*

Job description

You want to be part of a creative and innovative team and shape the future of mobility? You have a passion for E-Mobility, Autonomous Driving, Connectivity and Security? More than 80% of all innovations in a car are driven by semiconductors. As Senior Project Manager Technology Development you will be part of the decision-making process and executing for the development of sensor technologies in automotive and consumer applications. If this sounds interesting for you and you also want to drive change management while occasionally travelling to our design locations as well as working together with virtual and intercultural teams, we are happy to get in touch with you! With this position you will be entering our Project Manager career path: This is a special career path and attractive career opportunity for those who focus on managing projects and functional leadership of project team members.

In your new role you will:

- **Manage global technology and discrete development projects** for innovative automotive and consumer sensors from definition phase to volume production
- **Drive and execute decisions** and ensure communication within the team
- Act as the **interface to management, customers, and production sites**
- Manage the projects' scopes, risks, budgets and schedules
- **Structuring and controlling projects** and ensuring compliance by using Infineon's Project Management tools
- Be part of the **project management community** within the organization
- **Secure timely communications** to management and stakeholders on project progress
- **Grow trusted relationships** and drive a pro-active risk management in cooperation with all stakeholders to identify possible mitigation measures and /or to define appropriate backup scenarios

Profile

You recognize potential obstacles in time and use them as good opportunity for further improvement ensuring high quality by foresighted planning. If you cooperate across boundaries and appreciate the contributions of other people then you should join our team.

You are best equipped for those tasks if you have:

- A **degree in physics, engineering, material science** or comparable

At a glance

Location: **Munich (Germany)**
Job ID: **358908**

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
