

Senior Engineer, Component Verification

Job description

As a component verification engineer you have solid experience with measurement equipment such as oscilloscopes and meters; good familiarity with PCB layout tools and Labview. Even better, you have some application knowledge of DC-DC Converters! In this role, you will develop automated benchtop test capability for high performance power systems, validate new products and support device characterization. If you are looking to take your skills to a successful, productive and innovative global organization that will support your career growth then look no further!

In your new role you will:

- **Develop automated benchtop test capability** for high performance **power systems** (both hardware and software)
- **Validate new products** for functionality and **data sheet** requirements
- **Interpret data results** and **generate graphs** which will be incorporated into the data sheets and application notes
- Work with the design engineers to **debug new IC's**
- **Design PC boards (PCBs)** to support **device characterization**

Profile

You are a self-driven and motivated team player with excellent communication skills.

You are best equipped for this task if you have:

- **Associate's Degree in electrical engineering** or equivalent is required
- Good experience with measurement equipment such as **oscilloscopes and meters**
- Familiarity with **Orcad PCB layout tools** or equivalent
- Experience programming **Labview** compatible automated bench test equipment
- Ability to work well in a **team environment** within a matrix, global organization
- Application knowledge of **DC-DC converters** would be a plus

Infineon **Power & Sensor Systems (PSS)** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world.

Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.

Benefits

- **Morrisville, NC:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Health Benefits; Health promotion programs; 401K; Performance bonus; Accessibility, access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

Infineon Technologies Americas Corp. is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, childbirth, or related medical conditions), gender identity, national origin, ancestry, citizenship, age, physical or mental disability, legally protected medical condition, family care status, military or veteran status, marital status, domestic partner status, sexual orientation, or any other basis protected by local, state, or federal laws. Applicants with questions about access or requiring a reasonable accommodation for any part of the application or hiring process should contact the Talent Network by phone at (408) 503-2194.

Employment at Infineon is contingent upon proof of your legal right to work in the United States under applicable law, verification of satisfactory references and successful completion of a background check and drug test, and signing all your onboarding documents .

In some instances, if applicable, U.S. export control laws require that Infineon obtain a U.S. government export license prior to releasing technologies to certain persons. This offer is contingent upon Infineon's ability to satisfy these export control laws as related to your employment and anticipated job activities. The decision whether or not to submit and/or pursue an export license to satisfy this contingency, if applicable, shall be at Infineon's sole discretion.

IMPORTANT NOTICE :

Infineon is requiring all new U.S. employees and contractors to be fully vaccinated against COVID-19. Full vaccination is defined as two weeks after both doses of a two-dose vaccine or two weeks since a single-dose vaccine has been administered. Anyone unable to be vaccinated, either because of a sincerely held religious belief or a medical condition or disability that prevents them from being vaccinated, can request a reasonable accommodation.

Infineon Technologies takes data privacy and identity theft very seriously. As such, we do not request personally-identifiable information (PII) from applicants over the internet or electronically. Please kindly refrain from disclosing your PII electronically during the application process or to unauthorized websites that may purport to be Infineon or any of our affiliates.
