

Senior Staff Engineer

Job description

Infineon IOT Business Line is looking for a senior member for the applications team to provide Design proposals and technical definitions for Firmware, Middleware, and Hardware blocks.

Infineon IOT Business Line is looking for a senior member for the applications team.

The main tasks of this role would be:

- Provide Design proposals and technical definitions for Firmware, Middleware, and Hardware blocks.
- Work cross-functionally with Marketing, Customers, and Design teams to create suitable product solutions.
- Create technical articles, Application notes and represent tradeshow and external forums.
- Enable Design-win projects using Infineon's IoT portfolio involving wireless technologies like Bluetooth, BLE, Matter.
- Plan and execute projects along with other team members.
- Initiate and drive creative end solutions using product's capabilities and feature set.

Profile

- Work experience of 8-14 years in embedded system development
- Strong knowledge of system-level design and architecture in the embedded domain
- Ability to debug and solve complex issues with hardware and firmware integration
- Attention to detail, Proactive problem solving and self-driven
- Mentor and guide junior team members
