

(Junior) Project Manager for Frontend Planning and Controlling Projects (f/m/div)*

Job description

You want to actively contribute to the optimization of the planning and manufacturing landscape? You are open for new ideas and talented in bringing together experts from different locations and teams? Then join our Projects & Reporting (PR) team. As a (Junior) Project Manager for Frontend Planning and Controlling Projects you think out of the box and with your initiative you will be driving projects for our Operational Planning and Controlling (OPC) team. You gain an understanding of OPC and FE manufacturing business problems and work closely together with other Operations functions and related departments to define solutions.

In your new role you will:

- **Structure and actively manage Operational Planning and Controlling projects / sub-projects** of moderate complexity with diverse teams across operations and other functions with different cultural backgrounds
- Handle **resource planning and project controlling**
- **Grow trusted relationships and drive risk management** in cooperation with all stakeholders to identify possible mitigation measures
- **Be part of the Project Office**, incl. support in the coordination of a project roadmap and driving documentation and coordination activities

Profile

You have a structured and analytical way of thinking. You develop ideas and translate them into solution concepts. You are able to structure new situations while considering dependencies and priorities. With your good communication skills you can encourage your colleagues and cooperate with them in order to produce the best results for the organization. You pay attention to details, but never lose sight of the big picture.

You are best equipped for this task if you have:

- A competence skill set based on **a degree in business administration, industrial engineering** or equivalent
- At least **1-3 years professional experience in the area of supply chain / production or in project management** preferably within the semiconductor or other high technology industry
- Basic **Project Management and good MS-Office skills**
- Affinity to understand and **structure new topics**
- Able to **organize yourself and a project team**
