

## Senior Project Leader Chip Technology Development for E-Mobility (f/m/div)\*

### Job description

You want to cooperate with renowned players in the automotive industry? You would love to manage projects internationally and dive deeply into technical topics? Then we have just the right position for you! Come and join us! Work on the leading edge of the promising E-Mobility movement and take the technology development of our power devices to the next level.

As Senior Project Leader for Chip Technology Development you will develop ideas to their full implementation in close collaboration with the technology team! Furthermore, you will be responsible for the planning of projects.

In your new role you will:

- **Plan, control and execute development projects** for SiC-MOSFET, Si-IGBT and diode chip technologies for electro-mobility across various Infineon sites
- **Guide and motivate cross functional project teams** - you create energy and commitment to achieve ambitious project targets
- Be responsible for **project planning** including the **definition of work packages, timelines**, costs, resource planning and **stakeholder management**
- Conduct a forward-looking **risk management** to identify possible mitigation measures and/or backup scenarios
- **Align cross-functionally** with internal stakeholders

This position is part of the **Project Management Career Path**. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members. You want to learn more about the role as a Project Manager? Check out our profile story!

## Why Us

**Part of your life. Part of tomorrow.**

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

**– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –**

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon ATV is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
