

Teamleader Manufacturing Systems (f/m/div)*

Job description

Are you eager to further develop in a vibrating multinational environment? Are you a strategic thinker who pays great attention to details, quality-oriented, and focused on getting standardized solutions? Then join the Factory Intergration (FI) department in Warstein as a Senior Manager (f/m/div)* and be the teamleader of our motivated team of six experts in Warstein.

In your new role you will **lead a local team of 6 team members** in the Factory Integration department.

- **Ensure global and site legacy FI aligned services** that are continued and operated with high stability for production and be accountable for operational KPIs fulfilment and site operation stability, crisis management roster, change and rollout management according to FI standards
- Fulfill site needs alignment in term of **FI services performances**, including **functional roadmaps**, continuous driving **innovative FI solution and to site management** and drive local projects
- Be the **key site FI contact for Business Alignment and Internal Communication** and Escalation Management for all FI topics and support Site Big Picture and Industry 4.0 Initiative Alignment with the site production/automation/industrial engineering department management
- **Drive people development** and retention within the team, ensure right resources and competency in delivering their duties
- **Represent site FI in global FI meetings**, collect all relevant information for site reports and 8Ds from SLA violations
- Act as the **key account for Warstein local Bipolar Business** (if applicable)

Profile

You are quality-oriented and a “hands-on” person focused on solutions. As a team-player, you share information clearly and effectively and you are able to quickly establish a successful cooperation. Your spirit of initiative allows you to put decisions into work as soon as they are taken and you push ideas to their full implementation and application by supporting the team to excellence. You have a great experience with people and resource management at department and section level in a global matrix organization.

You are best equipped for this task if you have:

- A **university degree in Computer Science, (Business-) Information Technology, Management Information Systems, Mechanical Engineering** or similar

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
