

Internship: Pre-Silicon and Post-Silicon Functional Verification of Digital Designs (f/m/div)*

Job description

You are currently studying Computer Science, Electrical Engineering or a related subject? You are looking for a challenging verification internship in field of digital design to foster your skills? Apply now at the Development Center in Dresden!

In your new role you will:

- Get familiar with **Unix environment** and tools used for functional verification
- Gain hands-on experience with state-of-the-art verification concepts such as **SystemVerilog-UVM**
- Apply state-of-the-art verification tools to create a **reusable verification environment based on existing digital designs**
- Analyze the **feasibility of bridging the gap between pre and post-silicon verification**
- Document and analyze the obtained results

Profile

You are best equipped for this task if you:

- Are currently studying **Computer Science, Electrical Engineering** or a related subject
- Have basic **Unix/Linux knowledge**
- Are well versed with **object oriented programming**
- Have good knowledge in the field of **digital circuit design, Verilog and SystemVerilog** would be advantageous
- Ideally already gained knowledge about verification topics such as **SystemVerilog-UVM and communication protocols such as UART, SPI or I2C**

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript
- High school report

Contact

Lina-Marie Minuth
Student Attraction Manager

Additionally, the following requisites apply for working students:

- **You must be enrolled and not on academic leave:** Proper students (according to German law) are warmly welcome!
- **You should live close to the site:** More than 150 km distance is not recommended for a working student job due to the travel.

Benefits

- **Dresden:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International Assignments; Different Career Paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions in office jobs; Home Office possibilities; Part-time work possible (also during parental leave); Spots in local kindergarden; On-site social counselling and works doctor; Health promotion programs; Fitness Room; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement ; Performance bonus; Reduced price for public transport, car sharing, charging station for e-cars and e-bikes; Accessibility, access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The **Development Center Dresden** was launched in 2019 and is growing successfully. Today, a total of 92 top-class experts and young talents from 18 nations are working on research and development of new products and solutions for automotive and power electronics, chip design and verification, characterization of complex systems as well as development of products and solutions with artificial intelligence. In the long term, the Development Centre will employ around 250 people. State-of-the-art research and characterization labs facilitate R&D activities for automotive applications, electromobility and AI chips of the next but one generation. The Development Center covers the complete development value chain from product and system definition to qualification.

This is the right place for you, if you want to work in a high-tech environment, master challenges of advanced product development, be part of a multicultural team with great spirit and experience a startup-like culture.
