

## Lead Principal Concept Engineer Chip Technologies for E-mobility (f/m/div)\*

### Job description

Developing new power technologies is your passion? You are working self-driven and initiate new activities which involve profound know-how of application requirements and technology capabilities. You want to work within a multi-site R&D organization while being flexible when dealing with new and unpredictable situations. Then the position as Lead Principal Concept Engineer for automotive Power Device Technologies is the right opportunity for you! Join us now in Villach!

As a Lead Principal Concept Engineer you will take on the key role as a developer and bring the next generation of high-performance power devices to the market! You will be responsible for the electrical dimensioning of power devices, the technical direction for the future and the alignment of strategic pre-development activities.

In your new role you will:

- Bring **SiC-Mosfet, IGBT and diode power device technologies** for automotive E-mobility applications to the next level
- Be fully **responsible** for the **electrical dimensioning of the power devices** in wafer technology development projects
- Set **technical direction** for future SiC and Si technology development
- Use your comprehensive **understanding for application requirements** as well as competitors' technologies
- Drive and **align strategic pre-development activities** ensuring future success of technology / product development projects

With this position you will be entering our „**Technical Ladder**“: our **career path for experts**. You will be able to focus deeply on technology – while further pursuing your career. As you continually expand your expert knowledge, puzzle over matters and solve problems, you will position yourself as a thought leader – thus helping our products improve our world a bit more each day.

### Profile

You like to challenge the status quo and generate value with your ideas and solutions? Furthermore, you live up to high quality standards, strive for continuous improvement and think in a cooperative way. Last but not least, with your technical and entrepreneurial instinct you are contributing to the successful positioning of Infineon products into the target markets.

You are best equipped for this task if you have:
