

Student Job: Software Engineering (f/m/div)*

Job description

Are you an enthusiastic student interested in the technological evolution present in our daily lives? Do you want to be part of the development of next-generation IoT products? Then you are the team player we are missing! Join our team in Ukraine as a Software Engineer working student and strengthen your core competencies in preparation for a thriving career.

As a Software Engineer working student, you will support our team in system engineering tasks associated with the next generation's IoT products.

In your new role you will:

- Contribute to **system-level troubleshooting** during the product development and production stages;
- Support the team in **developing C++ applications using the QT platform**;
- **Collaborate with other colleagues from different areas of expertise**, namely software, digital hardware, RF IC design, operations and marketing.

Profile

You have strong problem-solving skills and are always ready for a new challenge. You have a team player mindset, cooperating easily with others in different projects in order to achieve top performance.

You are best equipped for this task if you:

- Are at least in the second year of a **degree in Computer Science, Electronic Engineering, Applied Mathematics** or in a similar field;
- Have previous experience with **Software/Firmware development**;
- Have programming skills in **C/C++**;
- Have knowledge of **scripting language** (such as **Python and Perl**);
- Have a good command of **English**.

Please send us your **CV in English** so we can get to know you better.

Benefits

- **Lviv**: Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon, we are proud to embrace (gender) diversity, including female, male and diverse.*

– Connected Secure Systems (CSS) is at the heart of the IoT –

The CSS division provides end-to-end systems for a connected, secured world – building on trusted, game-changing microcontrollers as well as wireless and security solutions. CSS delivers microcontrollers plus Wi-Fi, Bluetooth® and combined connectivity solutions (known as connectivity combos) along with hardware-based security technologies to power the broadest application spectrum spanning consumer electronics, IoT devices, cloud security, IT equipment, home appliances, connected cars, credit and debit cards, electronic passports, ID cards, and more. The division is at the forefront of computing, wireless connectivity, and trusted technologies that are helping to securely connect the networked systems of today and tomorrow
