

Senior Manager Production Management

Job description

Would you like to combine and balance your technical expertise and business attitude? Do you have a solid experience and knowledge in frontend and backend semiconductor production and enjoy working in cross-functional teams? If you are able to keep the overall big picture despite many details and willing to manage our products along entire manufacturing value chain from wafer start until shipment to the customer? Then this position in our Automotive division might be the right match for you. As Senior Production Manager you will be responsible to optimize productivity and profitability of Automotive MOSFETs by driving manufacturing improvements and leading transfer projects between Infineon manufacturing sites.

In your new role you will:

- Be responsible for the overall technical management of automotive products in the ramp up and high-volume production and act as interface between Business Line and Operations
- Drive and motivate cross functional ramp up teams as project lead
- Act as a driver and leader of change, transfer and strategic projects (technology, packages & products)
- Be the contact for all Infineon internal production sites as well as for operations for the respective product groups
- Drive cost of sales improvements in frontend and backend through yield, test, or process improvements in cooperation with all related production sites
- Contribute to strategies for assuring capacity growth and cost reduction

Profile

- You always keep the bigger picture in mind and act as if responsible for the benefits of the company as a whole. With your independent working style, you ensure that deliverables are complete in high quality and remain solution oriented in even complex situation. As a true team player, you are aware of cultural differences, cooperate across boundaries and appreciate the contributions of other people.
Beyond, you are best-equipped for this role if you have:
 - A degree in Electrical Engineering, Industrial Engineering, Physics, Chemistry or a related technical field
 - At least 6 years of professional experience as Product Engineer, Industrial Engineer, Quality Manager or similar roles in the semiconductor or comparable industries
 - Profound understanding of supply chain and manufacturing processes

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

Infineon Technologies (Malaysia) Sdn Bhd, with its 8.000 employees, is the largest manufacturing site of Infineon. The company has established itself as a leading manufacturing site for Power Semiconductors, Logic Semiconductors, Discrete and Sensor Products. We are committed to increasing productivity, on-time delivery and providing customized solutions while maintaining the highest level of product quality. The success of Infineon Melaka is evidenced by eleven National Awards received from the Prime Minister's Office as well as 15 corporate awards.
