

Senior Staff Product Application Engineer (f/m/div)*

Job description

Do you want to work at the cutting-edge of technology? Are you passionate about MEMS technology, used in the latest generation of IoT Devices, Headsets, Wearables and Mobile Phones? As a Product Application Engineer, you will support the top players and trendsetters of the consumer electronics market. Being part of our technical marketing team, you will inspire our customers with Infineon's latest technology, focus on design-wins and support our customers in the successful launch of their products. With this position, you will be entering our „technical ladder”: our career path for experts. You will be able to focus deeply on technology – while further pursuing your career. As you continually expand your expert knowledge, puzzle over matters and solve problems, you will position yourself as a technical leader, contribute to Infineon's high-tech reputation, and grow our business.

As a member of our technical marketing team, you will:

- **Drive go to market activities** from a technical perspective at our customers
- **Guide and train our regional field application engineers** around the world
- **Find the best solutions for our customers** in close alignment with our development teams
- **Aim for design-wins** in our fast-growing consumer market
- **Provide samples, support design-in activities** and drive root cause analyses of field returns
- **Engage with top-customers** and discuss new applications and use-cases

Profile

You like to engage actively with your customers and feel committed to given promises. You know how to balance the customers' requirements and the interests of Infineon. Above all, you are a team player and like to cooperate across boundaries to analyze and solve customer problems.

You are best equipped for this task if you have:

- A **technical degree in Electrical Engineering, Mechanical Engineering, Mechatronics** or similar
- At least **5 years of work experience** in the area of R&D, Application Engineering or Marketing
- Solid knowledge in at least one of the following fields: **MEMS, Acoustics, Mechatronics or Analog or Digital ASIC design**
- **Self-drive** and willingness to **take responsibility** within Infineon
- **Intercultural competence** and advanced communication skills

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

Infineon **PSS** semiconductors are enabling intelligent power management, smart sensitivity, and fast, reliable data processing in an increasingly digitalized world. Our state-of-the-art power and connectivity devices make chargers, servers, mainboards, power tools, and lighting systems smarter, smaller, lighter, and more energy-efficient. In addition, our trusted sensors give things an intuitive sensing capability to make them contextually aware, and our RF chips support fast and reliable data communications.
