

Quality Specialist Automotive (f/m/div)*

Job description

“Quality means doing it right when no one is looking” ~ Henry Ford. We totally agree with Henry Ford on this, as Infineon Technologies stands for high quality products with profound impact on the ever so fast changing automotive industry. Our goal is to make the car of the future a reality: all-electric and autonomous, fully connected, always online and cybersecure. To achieve this goal, our Automotive (ATV) division in Graz is currently looking for a Quality Specialist Automotive (f/m/div) with a talent for communication, organization and documentation. Stay ahead of the curve by driving your career to the next level. Chip in and apply now.

In this role, you will be a **valuable member** of our **Quality Management team** with special focus on fulfilling **customer requests** for **product quality documentation**. You're not only providing a keen ear for **customer inquiries**, but also work together with our **Quality Managers** on **exciting topics**. Demonstrate your dedication to quality by **addressing, discussing, and documenting customer needs** and **generating detailed statistics and evaluations**. This is a **unique opportunity** to develop your career and gain insight into the not only broad, but exciting field of **business line quality management**.

In this position, you will

- Fulfill **customer requests** for **product quality documentation**
- Generate **product quality documentation** which include **PPAPs, QPACs, CDCQs, and FIT rate reports**
- Understand and appropriately address **special customer requests** for **product quality documentation**
- Ensure the **correctness, completeness and consistency** of **product quality documentation** through **internal database checks** and **close alignments** with **relevant internal counterparts**
- Maintain the respective **documentation structure** to keep it **well organized** and **up to date**
- Regularly follow up on **open customer requests** for **product quality documentation** and ensure that **customer requested deadlines or target dates for completion** are met
- Create **statistics** and **evaluations** from **internal databases**
- Support the **execution and tracking** of **product qualification, product monitoring, and reliability risk assessment activities**
- Support **quality assurance tasks** in **development projects**
