

Quality Manager Product Development Automotive (f/m/div)*

Job description

Do you thrive when quality at its highest standards is required? Do you put the customer at the heart of your thoughts and actions – internally and externally? Do you want to participate in the exciting technological evolution of automotive electronics? Then we have a great opportunity for you. As a Quality Manager you will be responsible for the product quality management of your own product portfolio for the complete lifecycle from product definition through development, ramp-up and productive life.

In your new role you will:

- **Define qualification strategies**, plan and perform effective and efficient product qualifications
- **Ensure** that market and customer **quality requirements are met**
- **Safeguard the delivery quality** (participate/lead in focus teams, task forces, crisis teams or risk assessments)
- **Drive problem solving** activities
- **Support and drive** continuous **improvement** activities
- **Ensure development** according to applicable norms and standards (e.g. IATF 16949, ISO 26262)
- **Provide quality related documentation** for our customers and be the contact for quality related queries

Profile

As a Quality Manager, you have the ability to establish successful cooperation's, cooperate across boundaries and appreciate the contributions of other people. You have the ability to grasp problems and push them forward to a solution. You show awareness for quality in your area of work, manage risk carefully and demonstrate high quality standards. You are contributing to the entire product development process and ensure process compliance.

You are best equipped for this task if you have:

- A **degree in natural science, engineering or technology** (e.g. in Chemistry, Electrical Engineering, Microelectronics, Microsystem Technology, Physics or similar)
- At least 5 years of **relevant work experience** e.g. automotive or semiconductor technology

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

–

Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –

Semiconductors are essential to realize key trends like eMobility, automated driving and secure, connected cars. Infineon ATV is the #1 semiconductor partner in the fast-changing automotive world, based on our system knowledge coupled with our passion for innovation and quality. We are a key driver in the ever-advancing pace of digitalization in the automotive industry.

Infineon´s **Quality Management** department acts proactively to satisfy the needs of our customers to increase their success and to ensure 'best in class' product quality. Internally the department develops a living quality culture at all levels within the different divisions and at our partners.
