

Staff CAD Engineer Chip-Package-Board CoDesign Methodology (f/m/div)*

Job description

Are you a strategic thinker that is committed and motivated to learn new languages and develop new skills? At Infineon Villach, we are looking for a passionate CAD Engineer to grow our team responsible for the chip, package and board design and verification software ecosystem.

In your new role you will:

- **Integrate new methods** and **software tooling** into our established **chip, package** and **board design flow**
- **Contribute to the development** of our **in-house software add-ons** for **EDA frameworks** of **different vendors** (like from Cadence, Mentor, Ansys, Keysight,)
- Further **improve existing software modules** (including the testing, refactoring, and maintenance of existing code)
- **Write technical documentation** and strive for **continues quality improvements measures** in accordance to all relevant **quality assurance processes**
- **Conduct evaluations of existing tools & flow** and propose **improvement measures**
- **Train and support** our worldwide **hardware designer community**
- Build up **high-quality, innovative and performant solutions**
- Be the **1st level user support for in-house software solutions**

Profile

You are best equipped for this task if you have:

- **A degree in Computer Science, Electrical Engineering** or related areas
- At least **1-3 years of professional work experience** in **software development** and **implementation within an EDA environment** or a **related technical area**
- Good **programming skills** with focus on **object-oriented software development** (e.g. Python, Java, C++) in **Unix environments** and **familiarity with working and scripting on Linux**;
- **Knowledge of the Cadence design environment** is a plus
- **Problem-solving skills** and a **keen eye for the details**
- Enjoy to **work in a team** and **improve the functionality** and **usability of our software applications**
- **Fluent English skills**, German is an advantage

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The central R&D organization „**Design Enabling and Services**“ (DES) provides the design environment to the different Infineon product development teams. With state-of-the-art design methods, building blocks and a wide range of product development services DES supports Infineon's advanced IC development from early high level system models to verified products ready for manufacturing.

The City of **Villach** is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Due to its particular geographic location and the outstanding natural beauty of the region, Villach and the whole province of Carinthia have for generations been popular holiday destinations for people from all over the world. Its unique landscape combines mountains and valleys, lakes and rivers, city and countryside. In addition to the favorable geographic location, living in Austria also has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach benefits from its status as a “small town,” offering everyday living at affordable prices in an outstanding setting. So it's no surprise that the city on the Drau is considered the “home of work-life balance”.
