

## Senior Specialist Information Technology

### Job description

In your new role you will:

- Support the development of IT capacity planning solutions by understanding business needs and translating them into functional design proposals such as solution architecture
- Provide proof of concepts and prototypes for testing to improve user acceptance and experience
- Ensure compliance requirements and the fit to architecture standards by considering the bigger picture
- Support the implementation with our solution providers as well as contribute to the go-live, cutover and operations support
- Focus on, evaluate and support UX and trend technologies in the early stage of product lifecycles
