

Senior Staff Functional Safety Application Engineer (f/m/div)*

Job description

Through your constant safety inputs, as a Senior Staff Functional Safety Application Engineer, you guarantee the continuous development and improvement of our products and thus contribute significantly to our future success. If you are keen on working within an international environment and want to be part of shaping the future of mobility then this could be the right challenge for you!

Senior Staff Functional Safety Application Engineer play a **key role** in Infineon's products. It takes **technical skills** and **accuracy** plus a great deal of **team work** to get the job done.

In your new role you will:

- **Capture and analyze stakeholder inputs** regarding Functional Safety on application and product level for the next generation Magnetic Sensors
- **Verification of safety concepts** according to ISO26262 (DFA, FTA, FMEDA)
- **Create and update safety documents** like safety manual
- **Explain and defend the safety argumentation** to customers and other stakeholders
- **Extend and develop Functional Safety training material** and perform trainings for worldwide colleagues
- **Be the Functional Safety go-to person** during the world-wide Design-In of your Sensors

With this position you will be entering our „Technical Ladder”: our career path for experts. You will be able to focus deeply on technology – while further pursuing your career. As you continually expand your expert knowledge, puzzle over matters and solve problems, you will position yourself as a thought leader – thus helping our products improve our world a bit more each day.

During an **individual training phase** we prepare you optimally for your new tasks. With regular **feedback discussions** and planning of your **professional and personal development** we ensure your success in this position.
