

Qualification Engineer (f/m/div)*

Job description

Would you like to work as Qualification Engineer at a dynamic expanding multinational company, in Budapest's office, with 50 colleagues? Would you like to be an added value in the Semiconductor Industry for the greener and safer future? If your answer is a big YES, then apply for this position and become part of Infineon's Industrial Power Control team in Hungary!

On the role of Qualification Engineer, your daily work will include the risk assessment activity (FMEA); renewing current processes; supporting new suppliers/materials' introduction; being expert in the production coming lifecycle and reliability topics and analyzing fault root cause in a highly equipped laboratory (although this last is part of the job, your tasks will be mainly performed on the office).

In your new role you will also:

- Be responsible for **quality/ reliability topics** for upcoming changes and improvements of serial products;
- Define **qualification plans** for the **innovative product generations** as a member of an interdisciplinary team;
- Ensure the **reliability** of our products by **defining qualification methods** for future power semiconductor technologies and products;
- **Actively cooperate** with corresponding **QM departments** from other Infineon locations;
- Take part in **risk assessments process** and **problem-solving** activities.

Profile

You are determined, energetic, open for something new. You have high spirit, no fear of changes and focus on the solving the issues. You like working as part of a team and you have good command of English or/and German.

You are best equipped for this task if you have:

- **University/College** degree (specialized in a **technical field**);
- **At least 1 year of relevant experience**, aligned with basic knowledge of Semiconductors or Electrical Engineering, Chemistry or Physics;
- Knowledge and use of **technical statistical methods/programs**;
- Solid **knowledge of QM tools**, as an advantage;
- Fluency in **English and Hungarian**. German would be a plus.

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Industrial Power Control (IPC) empowers a world of unlimited energy –

Power semiconductors play a crucial role in increasing efficiency and reducing energy losses along the whole energy conversion chain.

As the global leader in power semiconductors, Infineon IPC delivers leading products and solutions for smart and efficient energy generation, transmission and consumption. We strive to make this planet a greener place where sufficient energy is accessible to everyone – wherever and whenever they need it.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
