

Working Student: Strategy – Power Integration & Supply (f/m/div)*

Job description

Are you fascinated about semiconductor technologies and want to serve the automotive products? You want to gain unique business, market and organizational insight of a leading technological company's operations and strategy? You want to support the Automotive Power Integration & Supply (PS) board on daily tasks and strategic projects? Then this job is your opportunity to become part of this exciting Automotive journey. Our team in Munich is looking forward to receive your application. You should live close to the site: More than 150 km distance is not recommended for a working student job due to the travel.

In your new role you will:

- Drive a **strategic project** in collaboration with the strategic marketing manager of ATV PS
- Assist the ATV PS leadership team and marketing teams with **daily tasks** (e.g. research, preparation of presentation materials)
- Visualize **concepts and insights for communication** towards marketing and top management
- Interact with several other **departments and functions**

Profile

You are best equipped for this task if you:

- Are currently at the end of your bachelor studies or are pursuing a master program in **Engineering, Business Administration, Computer Science** or an equivalent subject
- Ideally have **above average grades** on your studies
- Already gained **relevant work experience** in previous student jobs
- Are well experienced in using **MS Office, programming capabilities** are a plus
- Have strong **analytical and communicative capabilities** and a passion to drive **improvement with your own ideas**
- Have an **excellent command of English**, both written and oral

Please attach the following documents to your application:

- CV in English

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
