

Senior Manager Quality Management - Sense and Control MEMS (f/m/div)*

Job description

Do you want to shape the future towards safe and autonomous driving cars with Infineon's most complex products? Do you live up to high quality standards and want to team up with a worldwide development team? Then this position as Senior Manager Quality Management - Sense and Control MEMS is a great match for you! If you have an excellent sense for automotive customer requirements and want to become part of our automotive success story, then we are looking forward to your application.

In your new role you will:

- Represent **quality management in the business unit and towards the Japanese customers**
- Lead **quality improvement teams (Kaizen), focus teams, task forces, crisis teams, and risk assessments**
- **Ensure product quality and stability in spite of increasing operational challenges of product complexity**, Japanese customer requirements, and steep revenue growth
- **Drive information and documentation of product quality-related topics** like queries and qualification documents for customers
- **Ensure thorough and in-depth analysis** of issues and guarantee tailored reporting
- **Plan and perform effective and efficient product qualifications** independently and ensure that market and customer quality requirements are met
- **Stringent follow up on internal action items** and improvement measures
- Be the **responsible quality manager** for quality issues in volume production, and work very closely with both the business unit and our worldwide distributed production sites. Support production sites in case of **changes** and **deviations**

This position is suitable for full- and part-time.

Profile

The customer is king, the product 'your baby' and Infineon your team. As Senior Manager Quality Management - Sense and Control MEMS you manage to find the ideal solution for all of them, by listening closely to their needs and always striving for the global goal of "zero-defect". In order to reach best results, you thereby cooperate across boundaries, recognize and use your colleague's different areas of expertise and align their different points of view.

You are best equipped for this task if you have:

At a glance

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
