

## Student Job: Development of a Graphical User Interface (f/m/div)\*

### Job description

Are you familiar with HTML, CSS and modern Javascript frameworks such as vue.js? “npm run dev” is not a foreign concept to you? Then this is the right student job for you! You will be actively working on a prototypical development of an HTML-based configuration of a graphical user interface. This GUI will then be used to adjust and program the configuration of a chip on an USB demo board. If you like new and challenging projects, don't miss this opportunity and apply now!

In your new role you will:

- **Develop a prototype of an HTML-based graphical user interface (GUI)** that is used to adjust and program the configuration of a chip on an USB demo board;
- **Design of layout and interaction concept** of the GUI;
- Implementation of the layout and interaction concept **using modern web technologies** like HTML5, JS, vue.js or node.js.

### Profile

You are best equipped for this job, if you:

- Are currently studying **Computer Science, Electrical Engineering, Physics or something similar**.
- Show relevant knowledge in **programming of HTML/CSS/JS and Javascript frameworks** (preferably vue.js), **node.js as well as usage of git** for version control.
- Have **basic knowledge of UI/UX Design**.
- Already gained **experience in using Docker and container** is a plus.
- Are fluently speaking **English**, additional languages are a plus.

Please attach the following documents to your application:

- Your CV in English;
- Your certificate of enrollment at university;
- Your latest study transcript;
- Your high school report.

Additionally, the following requisites apply for student jobs:

- **You have to live somewhat close to the site:** more than 150 kilometers is too far a travel for a student job.
- **You have to be enrolled in either your Bachelor or your Master studies** to be eligible for a student job.
