

## Job description

Are you looking for the chance to provide leadership in an exciting industry? Do you also have experience in logistics, supply chain, or a related field? Our HiRel division is offering the opportunity to manage a small team in Materials Management. Come join our growing organization today!

Infineon's International Rectifier HiRel Products, Inc. division markets components that meet particularly high demands and survive under extreme environmental conditions. Application areas include space systems, commercial aviation, medical, oil and gas drilling, undersea telecommunication cable and defense technologies. IR HiRel offers a comprehensive portfolio of power management solutions with highly reliable, robust discretes and ICs, high temperature DC-DC converters, solid state relays and motor controllers.

### In your new role you will:

- Manage inventory controls, safety stock levels, work order kitting, and the material request process
- Manage and optimize the floor stock process
- Manage date code/expired material for raw materials and floor stock and support component obsolescence activities
- Manage up screening, element evaluations, and re-qualification of components
- Support Taiwan subcontractor material requirements
- Select, develop, and evaluate team members to ensure effective execution of various roles and responsibilities
- Organize the department to allow for flexibility in times of work imbalance including the identification of the required staffing levels and the definition of roles and responsibilities for each position
- Drive continuous improvement of the processes and team
- Lead team to fulfill safety and quality expectations and requirements

## Profile

### You are best equipped for this task if you have:

- 5+ years' experience in materials management, logistics, supply chain, or related field
- Bachelor's Degree in a related field (Engineering or Business)
- Strong working knowledge of ERP/MRP systems, (SAP a plus), and system utilization for supply chain management
- Experience in high reliability and/or military, aerospace, or space electronics a plus
- LEAN process training and certification a plus
