

Student for Lab Measurements & Test Engineering (f/m/div)*

Job description

Are you a university student looking to start a challenging career in a future-oriented company? Would you like to experience a dynamic environment, where you can share your ideas with experienced professionals? If you are passionate about high tech and have the skills to improve it – apply now to join us at the R&D Center in Padova!

During this experience, you will be able to:

- **Develop and support bench measurements** based on test specifications and test documentation;
- **Develop test hardware for lab measurements, feasibility studies and production testing;**
- **Develop test programs for lab measurement automation and characterization;**
- **Develop test programs for production and manage test results;**
- **Support design and test optimization.**

Profile

You are best equipped for these activities, if you already had **courses** on:

- Electronic Devices and Circuits;
- Electronic Circuits Fundamentals;
- Signal analysis;
- Measurement in Electronics;
- Object oriented programing.

For **Lab Measurements** you should have:

- **Knowledge of MatLab** for Lab and LabView;
- **Knowledge in lab instrumentation** (scopes, power supply, multimeters, PXI system);
- **Basic knowledge in simulation/layout tools**, such as PSpice;
- **Basic knowledge of C/C++, Java, VBA and any scripting languages;**
- **Good command of English.**

For **Test Engineering** ideally you have:

- **Programming skills** (VBA and C/C++ are preferred);
- **Basic knowledge of statistical data analysis;**
- **Good command of English.**
