

CAD Methodology Engineer (f/m/div)*

Job description

To strengthen our mixed-signal methodology & implementation team we are looking for an CAD Methodology Engineer who is willing to strive for excellence in the definition of mixed signal design methodology. You will be part of an international team responsible for building the bridge between analog and digital design teams.

In your new role you will:

- **Define state-of-the-art mixed signal design and implementation methodologies**
- **Own and drive Mixed signal Methodology topics**
- **Drive best practices and lessons learnt** from evaluations/benchmarks and customer interactions back into Methodology development
- **Share knowledge** with other analog/digital methodology experts at Infineon
- **Document methodology and evaluation results**
- Closely **cooperate with analog circuit and physical design engineers**, as well as with the digital design counterparts

You are a passionate individual who aspires to obtain outstanding results, takes initiatives and overcome difficulties in the pursuit of your targets. You demonstrate high quality standards for yourself and other people and communicate openly, clearly, and coherently.

Profile

You are best equipped for this task if you have:

- A **university degree** in **Electrical/Microelectronic/Computer Science Engineering**
- **1 to 5 years of direct Industry experience** (**electronics or software industry**)
- Software programming and scripting skills
- Experience with **Cadence** or **Synopsys EDA tools**
- Knowledge of **Analog and digital design methodologies** and **IC Technologies**
- Good language skills in **English and German**

We are filling this position through one of our leasing partners. A valid work permit for Austria or EU citizenship is a prerequisite for this position. This position is subject to the collective agreement for workers and employees in the electrical and electronics industry, employment group F/G based on relevant experience (<https://www.feei.at>)

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The central R&D organization „**Design Enabling and Services**“ (DES) provides the design environment to the different Infineon product development teams. With state-of-the-art design methods, building blocks and a wide range of product development services DES supports Infineon's advanced IC development from early high level system models to verified products ready for manufacturing.

The **City of Villach** is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Due to its particular geographic location and the outstanding natural beauty of the region, Villach and the whole province of Carinthia have for generations been popular holiday destinations for people from all over the world. Its unique landscape combines mountains and valleys, lakes and rivers, city and countryside. In addition to the favorable geographic location, living in Austria also has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach benefits from its status as a “small town,” offering everyday living at affordable prices in an outstanding setting. So it's no surprise that the city on the Drau is considered the “home of work-life balance”.
