

Jumpstart - Package Design Engineer

Job description

As a Jumpstart - Package Design Engineer, you will have the opportunity to learn about package design concepts.

In your new role you will:

- Contribute in the definition of general **package design methods**.
- Contribute in the generation of conceptual **package design/construction method** guidelines & work instruction documents.
- Support and learn on the job knowledge of **integration of assembly process**.
- Support and learn on the job knowledge of **Bill of Material (BOM) assessment**.

Profile

You are best equipped for this task if you have:

- Bachelor's Degree in **Microelectronics / Mechanical Engineering** or other relevant disciplines
- Knowledge of **design tools such as AutoCAD**
- Knowledge of **programming/scripting**
- Assembly knowledge highly advantageous
- This is a **24-month program, candidates with no prior working experience are welcome to apply**.

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.
