

System Engineer - Factory Integration (f/m/div)*

Job description

You want to contribute to the exciting technological evolution and are curious about factory integration? Do you enjoy constantly being challenged by the dynamics of the job? You are used to working proactively, interdisciplinary and independently? As our new System Engineer you get the chance to use your analytical and technical know-how and your communication and interpersonal skills! Apply now and come on board!

In your new role you will:

- Act as **2nd level support** of test & engineering data collection and analysis system used globally within Infineon - including 24x7 rotational oncall, solution administration, system maintenance, monitoring and operation to meet customer SLA/targets
- **Implement service request** and changes to fulfil user and customer needs
- Pro-actively **drive problem management** in scope, **evaluate** and deploy **new measures/solution** for operational stability improvements
- **Define** and **setup effective systems faulty detection** and **monitor** for early proactive failure detection
- Participate in **user requirement engineering**, **FIT & UAT** (including test case creation, test environment setup).
- Engage in **planning** and **schedule deployment of system releases** strategically (combine downtime, minimum production interruptions)
- Strive in **software** and **technologies refresh activities** and contribute to **global projects**

Profile

You are best equipped for this task if you have:

- A **Bachelor Degree** in **IT, Computer Science, Computer Engineering, Electronics Engineering** or similar with **1 - 2 years working experiences**
- **1-2 years** experience in **Semiconductor Manufacturing** and **systems/IT support**
- An understanding of **database systems** and **development** (e.g Oracle PL/SQL, SQL scripts, MS SQL)
- Knowledge in **incident management, problem management, event management, change and release management**
- Good **analytical** and **troubleshooting skills** and are able to drive root cause findings.
- Good **communication** and **interpersonal skills**, and the ability to **work independently** and as a good **team player**
