

Driving decarbonization and digitalization. Together.

Specialist for automated processes / lateral career move in semiconductor industry (f/m/div)

Job description

As a specialist, you will use software applications to monitor our production systems and respond to process deviations. We are looking for your support for various process areas (wafer test, plasma processes, lithography, wet chemistry, furnace technology, etc.). Are you looking for a career start or a career change with a long-term perspective? Then we should get to know each other! No matter if you are from the region of Dresden, Cottbus, Zwickau, Hoyerswerda or from somewhere else: at our location in Dresden you will find what you are looking for! We are expanding our production capacities and are looking for you as a maintenance technician to strengthen our experienced team. Apply easily in 90 seconds with your resume!

In your new role you will be:

- **Operating and monitoring** our automated production systems
- **Capturing, coordinating & processing error messages** using production software
- **Evaluating and documenting deviations** by using decision-making tools
- **Implementing the measures** to maintain production stability
- **Supporting continuous improvement processes** and exchanging the results with the department

The continuous shift operation schedule is introduced. The work duration is 8 hours per shift / 36 per week with the rhythm 6/4. The work is proceeded in a cleanroom environment

Profile

As a specialist for automated processes, you remain aware of the big picture even in complex situations and take decisions despite uncertain circumstances. You add to the feeling of cohesion in your area and are able to quickly establish a successful cooperation.

You are best equipped for this task if you:

- Have completed a **vocational training** (preferably in the technical, electrical or technological field, e.g. as a process mechanic) or have an A Level
- Ideally have some **work experience in a production company** and are skilled in IT
- Are **enthusiastic for challenging tasks** in a highly automated production environment and for being the part of a team
- Are experienced in using **MS Office** or other software applications

Why Us

#WeAreIn for driving decarbonization and digitalization.

As a global leader in semiconductor solutions in power systems and IoT, Infineon enables game-changing solutions for green and efficient energy, clean and safe mobility, as well as smart and secure IoT. Together, we drive innovation and customer success, while caring for our people and empowering them to reach ambitious goals. Be a part of making life easier, safer and greener.

Are you in?

The **Frontend (FE)** cluster combines the highest technology and manufacturing expertise to produce innovative and reliable products. The portfolio consists of power, bipolar, sensors, SMART-power and diode technology as well as CMOS, RF-CMOS and embedded flash technologies. The manufacturing sites in Austin, Dresden, Kulim, Regensburg and Villach are committed to "Operational Excellence" with a strong customer focus.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
