

Driving decarbonization and digitalization. Together.

Specialist / Expert in Process Control (f/m/div)

Job description

In your role, you will monitor our production facilities and respond to process deviations. You will carry out extensive problem analyses and derive necessary measures via statistical process control. You will carry out your tasks with a high degree of accuracy and make decisions to ensure that production processes run smoothly. We are looking for your support in one of various process areas (e.g. wafer testing, plasma processes, lithography, furnace technology or metrology). Do you already have some technical work experience or semiconductor experience and are you looking for a career start or a career change with a long-term perspective? Then we should get to know each other! No matter if you are from the region of Dresden, Cottbus, Zwickau, Hoyerswerda or from somewhere else: at our location in Dresden you will find what you are looking for! We are expanding our production capacities and are looking for you as a maintenance technician to strengthen our experienced team. Apply easily in 90 seconds with your resume!

In your new role you will be:

- **Operating and monitoring** our automated production systems
- **Capturing errors** and process evaluation
- **Evaluating, prioritizing and analyzing process deviations**
- **Providing statistical process control** and evaluation of data
- **Carrying out measures** for the requalification and commissioning of production systems
- **Carrying out experiments/process trials**
- **Supporting and implementing** continuous **improvement** processes and collaborating with the department

The continuous shift operation schedule is introduced. The work duration is 8 hours per shift / 36 per week with the rhythm 6/4. The work is proceeded in a cleanroom environment.

Profile

As a specialist/expert in process control, you remain aware of the big picture even in complex situations and take decisions despite uncertain circumstances. You add to the feeling of cohesion in your area and are able to quickly establish a successful cooperation.

You are best equipped for this task if you:

Why Us

#WeAreIn for driving decarbonization and digitalization.

As a global leader in semiconductor solutions in power systems and IoT, Infineon enables game-changing solutions for green and efficient energy, clean and safe mobility, as well as smart and secure IoT. Together, we drive innovation and customer success, while caring for our people and empowering them to reach ambitious goals. Be a part of making life easier, safer and greener.

Are you in?

The **Frontend (FE)** cluster combines the highest technology and manufacturing expertise to produce innovative and reliable products. The portfolio consists of power, bipolar, sensors, SMART-power and diode technology as well as CMOS, RF-CMOS and embedded flash technologies. The manufacturing sites in Austin, Dresden, Kulim, Regensburg and Villach are committed to "Operational Excellence" with a strong customer focus.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
