

Driving decarbonization and digitalization. Together.

Field Application Engineer Automotive (f/m/div)

Job description

Are you keen on megatrends within the automotive industry, such as e-mobility? You are a proactive and creative personality and want to shape the future? As Field Application Engineer for Automotive at Infineon, you will support our customers as application expert during the evaluation and development of their systems – you accomplish a joint success for both parties. To achieve this, you will be thoroughly trained to prepare you for your job being a specialist for Infineon High Voltage Power products. Furthermore, we provide you the opportunity to work on innovative automotive trends in our highly motivated team: You will get the chance to work on creative solutions for tomorrow. Take your chance now! With this position, you will be entering the „technical ladder“: our career path for experts. The Technical Ladder is a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value.

In your new role you will:

- Be the topic owner and **first level technical contact for our key automotive customers** in Europe
- Be responsible for technical support with **a focus on low and high voltage power products and sensors**, within our Automotive product portfolio
- **Drive and support all major automotive future application trends**, from autonomous driving to emission-free mobility (battery electric vehicles)
- **Provide expert technical guidance** and support for customer product designs and platforms
- **Work proactively on optimized solutions for our customer's applications** together with the entire European Technical Marketing Team, the account managers and the product experts
- Prepare and execute **customer presentations** and train our customers on products, implementations and applications
- **Support our customers in the system design** from concept to production release throughout all development project phases
- **Validate the application** on-site together with the customer
- **Discuss innovative applications with the customer** development teams and collaborate with our development departments and marketing teams

Profile

Strong communication skills are your outstanding strength, and you know how to build lasting relationships and networks. In your thinking you always consider the impact of your actions, and you give equal consideration to your team members and your

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
