

Driving decarbonization and digitalization. Together.

Staff Application Engineer High Voltage Discretes for Onboard Charger (f/m/div)

Job description

Are you an expert in the field of power electronics and interested in semiconductors Discretes for Onboard Charger? Do you enjoy working in an international team and a flexible environment? Then this might be THE chance for you! You will support the design-in of our products based on external & internal stakeholder requirements and act as technical interface to key customers and system manufacturers. Have we aroused your interest? Then we are looking forward to receive your application.

In the Technical Marketing Team you will closely collaborate with international customers and system manufacturers to support design-in activities and understand application needs.

In your new role you will:

- Be part of **product development projects** for our **high voltage discrete products**: drive the final data sheet and other go-to-market collaterals such as application notes and evaluation boards
- Drive as **technical customer interface** the technical evaluation and design-in of our products
- **Identify** and **analyze new system concepts**, provide technical solutions to our customers and/or derive the impact on our products
- **Analyze** and **assess topologies** and **application relevant operating conditions** via simulation and measurements on prototypes
- Prepare and **provide technical documentation** and **trainings** on product and application level
- Be part of a **global interdisciplinary expert team** consisting of technical marketing, product development, quality, finance, sales and regional marketing.

With this position, you will enter our "Technical Ladder" career path. The Technical Ladder is a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value.

Profile

You are best equipped for this task if you have:

- A **degree in electrical engineering**, power electronics, physics or a related field
- Several years of **experience** in the **design, development** and **testing** of power electronic systems and/or semiconductors

At a glance

Location: **Villach (Austria)**
Job ID: **HRC0357543**
Start date: **as soon as possible**
Entry level: **5+ years**
Type: **Full time**
Contract: **Permanent**

Katharina Steiner
Recruiter

- Shown a **ability of solving complex technical issues** involving expert network
- Advanced **communication skills** and **team player** mind-set
- Excellent **English skills**, including the ability to present and reporting a clear and convincing manner

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group G (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2023.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

Benefits

- **Villach:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; Child care in Villach & Klagenfurt; On-site social counselling and works doctor; Health promotion programs; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement; Performance bonus; Accessibility, access for wheelchairs

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon ATV is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
