# Driving decarbonization and digitalization. Together.

# Staff Engineer Product & Test Engineering

# Job description

In your new role you will:

- Define test concepts and test specifications for Integrated GaN solutions in cooperation with the concept engineering and design team
- Develop innovative test methods including DfT and optimize test software for the ATE (Automated Test Equipment)
- Design product specific test hardware for wafer and final test
- Analyze, debug and characterize new products on the test system
- Identify and introduce test package improvements to realize test time reduction and cost optimization
- Transfer test packages to our production sites in Europe and Asia incl. intercontinental travelling (max. 10%)
- Provide production ramp-up support
- Closely team-up with concept, design, verification, characterization, production and technology engineers

### **Profile**

You are best equipped for this task if you have:

- A university / university of applied sciences degree in Electronics Engineering, Electrical or comparable
- At least 3-5 years of working experience in IC and/or Wide Bandgap discrete test development engineering within the semiconductor industry
- Expertise in mixed-signal power test on Eagle ETS-88 or ETS-364 (or similar) is preferred
- Skills in analog or mixed signal electronic circuits and test program coding and debugging.
- Experience on testing of GaN or SiC power devices is a plus
- Fluent English skills (willingness to learn German is a plus)
- Technical driving skills, results oriented behavior and strong communication skills within global teams
- Multiple openings are available

# Why Us

### Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

### We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
