Driving decarbonization and digitalization. Together.

Working Student: Development of an importer /exporter for a web application (f/m/div)

Job description

We are more than 58,600 employees worldwide at 86 locations. If you want to become a part of Infineon and help us make life easier, safer and greener, then apply! We are looking forward to your application!

In chip development, there is a group that takes care of testing the chip properly in production to sort out the good from the bad ones. This group is called Test Engineering. They need a tool to connect various requirements to their test specification, help them to manage relevant test limits and the sequence of test execution for all relevant product variants. In addition, all this data needs to be exported in a way such that they can include it into their test program. Our task is to provide and maintain such a tool and support projects in data migration. Support us with:

- **Working reliable**: Development of an importer/exporter for a web application
- **Taking responsibility**: Project data migration

Profile

- **Study field**: You are currently studying, informatics or a similar field with the focus on software engineering/development
- **Passion for web development**: You are familiar with HTML & CSS as wells as with C# >= v8 or .NET technologies in general
- **Skills and experience**: You have already worked with relational Databases, especially MS-SQL
- **Personality**: You are a team player that is very reliable
- **Knowledge**: Basic knowledge about Blazor development (virtual DOM; SignalR) is beneficial
- **Language skills**: You are fluent in English

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript (not older than 6 months)
- High school report

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

The central R&D organization **„Design Enabling and Services" (DES)** provides the design environments (design-systems) to the different product development teams at Infineon. With leading edge design methods, complex building blocks and a wide range of product development services DES enables Infineon's advanced IC development. This means the complete value creation chain from abstract system models down to the fully verified product layout which ensures high quality manufacturing readiness.

We are on a journey to create the best Infineon for everyone.
This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.
We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.
Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
