

Driving decarbonization and digitalization. Together.

Project Manager - Product Development (f/m/div)

Job description

Do responsibility, quality awareness, and a strong customer orientation characterize you? Are you a team player who can bring people together towards a common goal and achieve top results? In Budapest you will find the right environment and a culture that promotes commitment, boosts trust, and drives innovation. Join us as Project Manager and help us shape the future of technology

As a Project Manager in the Product Development field, you will join a growing team and lead development projects through all milestones, coordinating a project and managing the product from the first design phase until the running production and sustaining tasks. You will be a key member of the development team, interacting with different stakeholders and driving the project team to success.

In your new role, you will:

- Be the overall responsible for the project's success: **time and resource planning**, **project budget**, and **performance targets**.
- Assure the continuous **control** of the **project risks**.
- **Lead and develop the project's teams**.
- Set up **successful stakeholder management**, and active and target-oriented communication with all relevant interfaces.
- Establish a **trustful and constructive collaboration**.

Profile

Your dedication to customer's needs ensures a strong and short feedback loop on requirements. Thereby you remain aware of the big picture even in complex situations. You know how to cooperate across boundaries, building efficient synergies between your team members and with other departments in order to achieve the best results. Moreover, your team spirit allows you to communicate openly, clearly, and you coherently think and act in a cooperative way, working closely with international and cross-functional integrated project teams.

You are best equipped for this task if you have:

- University degree in Electrical Engineering, Mechatronics, Physics, Chemical Engineering, or related area.
- **At least 1 year of experience in project management** in a technical environment.
- Basic knowledge in the technical field of **power electronics** or **power semiconductors** is an advantage.

At a glance

Location: **Budapest (Hungary)**
Job ID: **HRC0709512**
Start date: **as soon as possible**
Entry level: **1-3 years**
Type: **Full time**
Contract: **Permanent**

Recruiter

- Good **communication skills**, and ability to present complex topics in an elegant and presentable manner.
- **Fluency in English.** Hungarian knowledge would be a plus.

Please send us your CV in English.

Benefits

- **Budapest:** Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Holiday child care; On-site canteen; Corporate pension benefits; Performance bonus; Reduced price for public transport; Possibility to work remotely from abroad (EU)

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

– Green Industrial Power (GIP) empowers a world of unlimited green energy –

The GIP division delivers leading semiconductor solutions for the smart, green, and efficient conversion of electrical energy, covering all steps in the energy chain from generation through transmission to storage and consumption. Its broad range of applications spans renewable energies, electric vehicle charging, industrial power supplies, trains, electric commercial vehicles, and home appliances.

The GIP product portfolio encompasses IGBT power transistors and the driver ICs that control them, flanked by an expanding lineup of solutions based on SiC. Its growing analytics, service, and software offering complements this wide spectrum – reaching beyond products to create additional value for customers. Infineon is the global number one in power semiconductors and – with the broadest portfolio of SiC solutions for industrial applications – GIP is leading the transition to wide-bandgap technologies. GIP solutions handle energy more intelligently and efficiently – driving decarbonization for a better tomorrow.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
