Driving decarbonization and digitalization. Together.

Senior Scrum Master / Release Train Engineer

Job description

We are seeking a talented and experienced Senior Scrum/Agile Master / Release Train Engineer (RTE) to join our organization and help us become more efficient and effective in delivering high-quality products and maximizing value through iterative and incremental development. The ideal candidate will have a proven track record of helping organizations implement agile practices and scale using the Scaled Agile Framework (SAFe). As a Release Train Engineer, you will be responsible for guiding agile transformation efforts, creating and implementing strategies, and working with teams to ensure the successful adoption of agile methodologies.

In your new role, you will:

- Lead the Scrum process and facilitate Scrum ceremonies on the Agile Release Train (ART) level by facilitating the PI Planning and supporting the PI execution.
- Coach/train the ART and mentor other Scrum Masters and team members on Agile principles and methodologies, including Scrum, Kanban, and others.
- Help the ART to identify and remove any impediments or roadblocks that may be hindering their progress.
- Facilitate communication and collaboration within the ART and with stakeholders.
- Work with the Product Management and System Architect to prioritize and manage the ART backlog, ensuring that aligns with the overall product vision and strategy.
- Establish ART flow measures and continuously monitor and improve the flow of value.
- Help to identify bottlenecks and areas for process improvement, and lead initiatives to implement these improvements.
- Foster a culture of relentless improvement and learning within the ART and organization.

Profile

You are best equipped for this task if you have:

- Bachelor's degree preferably in Software Engineering, Computer Science, Information Technology or equivalent.
- At least 10 years of professional experience, out of which at least 6 – 7 years in an agile context, preferably in the position of a Scrum Master/Agile Coach/RTE/SPC or similar.
- Deep knowledge of, and experience in working with Agile principles and methodologies, including Scrum, Kanban, SAFe, and others.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.
This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.
Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
