Driving decarbonization and digitalization. Together.

IT Architect for Finance & Supply Chain (f/m/div)

Job description

Are you passionate about driving innovation and process improvement in a dynamic, collaborative environment? Join us as we seek a talented individual to lead our decision intelligence-driven process automation initiatives. You will have the opportunity to collaborate with cross-functional teams, particularly within Finance and Supply Chain, to uncover areas for enhancement and efficiency. Using cutting-edge process mining tools, you will identify opportunities for automation and intelligent decision-making, contributing to the strategic roadmap for automation initiatives. As the technical lead, you will provide expertise and guidance to development teams and engage with stakeholders to ensure seamless alignment with business objectives. If you thrive in continuously evaluating emerging technologies and enjoy mentoring others to embed best practices, we want to hear from you. Embrace the challenge of driving continuous improvement and be part of a culture that values innovation and excellence. Apply now and take the next step in your career with us!

In your new role you will:

- **Collaborate with cross-functional teams** while working closely with Finance and Supply Chain teams to understand their processes and identify areas for improvement
- Support **Process Analysis** and **use process Mining tools** to identify opportunities for automation and intelligent decision-making
- Develop and implement a **strategic roadmap for automation initiatives**, leveraging decision intelligence principles to enhance business processes
- Serve as the **technical lead for decision intelligence-driven process automation**, providing expertise and guidance to development teams
- **Engage with key stakeholders** to gather requirements, communicate technical solutions, and ensure alignment with business objectives
- Evaluate **emerging technologies and tools** in the decision intelligence space to continuously improve automation capabilities
- Collaborate with and **mentor cross-functional teams to embed decision** intelligence best practices into their processes
- **Drive a culture of continuous improvement** by identifying opportunities to optimize existing automated processes

Profile

- Strong analytical and problem-solving skills to identify automation opportunities and design effective solutions
- A solid understanding of business processes, KPIs, and the ability to align technical solutions with strategic business objectives

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.
This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.
We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.
Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
