

Driving decarbonization and digitalization. Together.

Cyber & Information Security Governance Senior Specialist (f/m/div)

Job description

Are you looking for an opportunity to oversee and enhance Infineon's global Cyber & Information Security Management System? Do you have proven experience ensuring compliance with diverse security standards and driving governance and compliance initiatives? Infineon's Cyber team is hiring, and we want you to be a part of it. Infineon's Cyber team spans across several countries around the world and covers Cyber Governance & Risk, Consulting, Security Monitoring, Incident Response & Digital Forensics and OT Security functions globally. Join our Cyber team as a Cyber & Information Security Governance Senior Specialist and make your impact in the world of cybersecurity.

As a Cyber & Information Security Governance Senior Specialist, you will be part of the Governance and Education team within the Governance & Risk function and be responsible for the maintenance and continuous improvement of our Cyber & Information Security Management System as well as for driving various Cyber Security compliance initiatives and their integration into the management system to enable the continuous and secure growth of Infineon's business.

In your new role you will:

- Be responsible for the **maintenance and continuous improvement** of Infineon's **Cyber & Information Security Management System globally**
- Ensure **Infineon's continuous compliance** with legal, contractual and internal security requirements as well as **certified Security Standards**(e.g. ISO27001, TISAX, Common Criteria, GSMA, etc.)
- **Drive the improvement** of Infineon's **governance & compliance tool** and landscape
- Head or be part of **cyber security compliance projects** that aim to identify and remedy gaps towards new or changing contractual, regulatory or legal cyber security requirements
- Support the **maintenance and improvement** of the **Governance & Education function** and related processes as well as the **Cyber & Information security control framework**
- Drive and continuously **improve the integration of Cyber Security controls** in Infineon's (business) process landscape.

Profile

You have a hands-on approach to work and can take responsibility for your own area of expertise. You have a proactive and enthusiastic attitude and can establish a successful

collaboration with people across different levels and functions of the organization. Moreover, you have excellent communication skills and enjoy sharing your knowledge and providing guidance to others.

You are best equipped for this task if you have:

- A degree in **Computer Science, Information Systems, Information Technology**, or an equivalent qualification – ideally with a focus on Cyber / Information Security
- Several years of practical experience as a **subject matter expert** or **consultant** in **Cyber / Information Security GRC** - preferably in an international environment field
- Knowledge of general **Cyber / Information Security Standards** such as **NIST** and **ISO27001**, and ideally **industry-specific Security Standards** (e.g. **TISAX, Common Criteria, GSMA**)
- **Project management experience** in leading international, multi-disciplinary teams in cyber security governance implementation is a plus
- Relevant **Security Certifications** (e.g. ISO27001 Lead Implementer/Auditor, CISA, CISM, CISSP) are a plus
- **Fluency in English** (mandatory).

Please send us your CV in English.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.
