

Driving decarbonization and digitalization. Together.

Senior Project Manager

Job description

In your new role you will:

- As a Senior Project Manager for Programmable System on Chip (PSoC) Microcontrollers, you will coordinate the project team -Concept, Design, Marketing, Product, Test Engineering, and Quality Management–in compliance with the defined development process and in conformance with Automotive Functional Safety Standards.
- Manage mid-size product development projects / sub projects with strong connection to Frontend technologies and Backend processes.
- Be fully responsible for all operational decisions concerning a given project for the successful achievements of the defined milestones.
- Coordinate and synchronize activities with Product and Technical Marketing, Software, Technology, Product, Test and Reliability Engineering teams
- Manage and control the entire project life-cycle as main contact person for all questions regarding the project (status, forecast, quality and product delivery)
- Conduct forward-looking risk management in close cooperation with your stakeholders, where you identify possible mitigation measures and containment action scenarios.
- Regularly report to Business Line management and take care of the top-level project documentation process

Profile

You are best equipped for this task if you have:

- A degree in Electrical/Electronic Engineering, Business Administration or similar field.
- A good understanding of semiconductor technologies and products.
- Minimum 5 years of product management experience.
- Working experience in the semiconductor or related technology industries, preferably dealing with multi- site/multicultural teams.
- Knowledge in project life-cycle and related project management processes and methodologies (i.e. planning/schedule management, risk management, tracking, reporting, and focused-issue cross functional team management)
- Knowledge on ISO26262 (Automotive Functional Safety) standard is a plus
- Fluent English skills
