

# Driving decarbonization and digitalization. Together.

## Senior Staff Specialist Production Management

### Job description

In your new role you will:

- Act as an interface with various business organizations, either internal or external, and carry out all necessary responsibilities and convey communications professionally.
- Responsible for production management strategies and contribute to growth of product line or company business.
- Lead broader transfer projects (e.g. subcon) as project manager or lead the volume core team in a global, multi-cultural setup; leading virtual teams from the relevant manufacturing sites, Engineering, Finance, Marketing and Quality.
- Contribute to product ramp-up (after transfer) and ensure whole product lifetime considering the technical capabilities of corresponding sites (FE and BE)
- Post qualification ownership for product/system and change management across all functional areas after production release
- Act as business project leader for product transfers for defined product portfolio
- Operationally contribute to the focus teams in case of production/quality deviations in FE or BE with clear root cause, if delivery impact is expected
- Define and implement supply chain and production concepts, integrate logistical requirements during product definition
- Identify cost or yield detractors through data analysis and drive improvement actions.

### Profile

You are best equipped for this task if you have:

- A degree in Electrical Engineering or in Physics
- At least 6 years of functional experience in the semiconductor industry in manufacturing, R&D, Supply Chain
- Experience in working in multicultural organizations
- Knowledge & experience in industry environment of semiconductor manufacturing & automation; knowledge of industry standards, benchmarks and competitors
- High degree of analytical skills: structuring of complex situations considering dependencies and priorities
- Experience with the implementation of innovative solutions in technology and product development, manufacturing, product transfer and conversions/changes
