

## Vice President Product Development WCS

### Job description

As the Vice President of Product Development, you will lead a Product Development Organization for the Wired Connectivity Solutions Product Line across multiple sites. You will apply your expertise in all aspects of IC development, your stellar communication skills & tenacity, and breakthrough analytical thinking and problem solving skills to ensure the successful development of products, drive initiatives and lead your team to success. Apply now if you are ready to take on your next challenge!

#### In your new role you will:

- **Manage the product development team** across multiple sites
- **Develop product roadmaps** in conjunction with marketing and applications teams
- **Define Architecture and micro-architecture** of products
- Ensure successful **development of products**, from concept to production, with high quality for First Pass Success and driving aggressive timelines needed for success of the business
- **Interface** with other functional groups and driving methodologies across groups
- Collaborate with **Process Technology groups** to **define new devices and technology** to meet business needs
- Create Product Line level strategic (multi-year) plan and subcomponents. Setting and deploying goals consistent with business strategy
- **Represent** Product Line engineering/product development **to customers**
- **Drive innovation**
- Successfully **drive initiatives** across the company
- **Frame** and creatively **solve** problems
- **Implement** best known industry **tools/methods** for product development

### Profile

#### You are best equipped for this task if you have:

- **Bachelor's or Master's degree** in **Electrical Engineering** (MBA a plus)
- **15-20+ years** of related work experience (Semiconductor industry preferred)
- A proven track record **managing successful project execution** and meeting schedules
- Experience in **managing teams** across **multiple locations** and successfully running large organizations
