

Lead System Developer (f/m/div)*

Job description

You would like to be part of an international setup in semiconductor test automation at Infineon? You already have experience with service-oriented architectures? Apply now and become part of our global team in Villach!

As a Lead System Developer you will work in a global team on the design and further development of our systems as well as the optimisation of software development processes.

Your new tasks will be:

- **Design and co-development in the software life cycle** for our test control software TEC
- **Management of software development projects** in smaller cross-border development teams in close coordination with our test technologists
- **Concept and software development** (Java) for system control in the area of wafer testing incl. **enhancements** in terms of stability, maintainability and performance
- **Automation and optimisation of processes** in software development (DevOps)
- **Ensure the operations** of our applications at second level
- **Application support** (Incident Management)
- **24 x 7 on-call duty** in a global team

During an **individual training phase**, we prepare you optimally for your new tasks. With **regular feedback discussions** and **planning of your professional and personal development**, we want to ensure your success in this job. In our international and multidisciplinary environment, you can also benefit from the extensive knowledge and expertise that characterizes Infineon employees worldwide. Your future tasks can partly be done in **Homeoffice**.

Profile

You are best equipped for this task if you have:

- Completed a **degree** (Bachelor's/Master's) in the field of **Computer Science, Information Technology** or similar
- **Sound knowledge** of object-oriented **application development** (Java, .net, UML)
- At least **3 years of relevant work experience**, e.g. in MVP design pattern, Eclipse RCP, Java Spring in SOA environments
- In-depth **knowledge of system administration** in Windows and Unix environments (also Shell, Perl)

- **Villach:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; Child care in Villach & Klagenfurt; On-site social counselling and works doctor; Health promotion programs; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement; Performance bonus; Accessibility, access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Strengthen a globally networked team in the area of **Factory Integration (FI)** with your knowhow. All activities in automation technology are bundled here. Solutions are created that are groundbreaking for the FI landscape within the Infineon Group. Become part of the team and apply now!

The City of **Villach** is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Living in Austria has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach itself benefits from its status as a "small town", offering everyday living at affordable prices in an outstanding setting.
