

Senior Project Manager Product Development Power ICs (f/m/div)*

Job description

You are looking for new challenges? You want to drive the development of new, innovative power management solutions with professional project management methods? As Senior Project Manager you have the opportunity to do exactly that. You will be part of Infineon's PSS DCDC Business segment and lead product development projects with significant complexity and noticeable impact to the business success of the organization. You will work with diverse, cross functional and international project teams as well as with all levels of management up to senior executive level. Sounds interesting? Then send us your vita and become a part of our highly motivated team. This position is part of the Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- Lead **product development projects with significant complexity**, risk and noticeable impact for the DC-DC organization
- Look at the **bigger picture, with business in mind**, in order to identify challenges and working closely with your stakeholders to come-up with solutions
- Conduct a **forward-looking risk management** to identify possible mitigation measures or backup scenarios
- Assume full responsibility for your projects by **continuously assessing the progress and adjusting the project plan** to ensure that goals are met even in the face of challenges. This also involves **anticipating and proactively managing** significant changes to the existing project agreement
- Form, **guide and motivate diverse, cross-functional project teams**
- Actively **manage internal and external key stakeholders** in an international environment, negotiate trade-offs and motivate others towards common goals
- Ensure that the project is in compliance with **internal rules and regulations** at any stage of the project life-cycle

Profile

You communicate openly, clearly and act as a visible model of what you expect from others. You ensure high quality by foresighted planning, understand root causes of potential project delays and develop suitable solutions.

You are best equipped for this task if you have:

- A **degree** in **Electrical Engineering, Physics, Microelectronics** or similar

- A formal **PM certification** (e.g. IPMA or PMI) or training
- Hands on **project management skills** in the arena of mixed signal IC or power conversion, experience with **IC Design** a plus
- Experience in **managing conflicts or crisis situations**
- Thrive in a **matrix organization**
- And are **willing to travel** as needed within Europe, to Asia and the United States
- Great **intercultural competencies** and communication skills and bring your messages across with you **excellent English skills**

Benefits

- **Munich:**

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing and data transfer capabilities –

Infineon **PSS** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world. Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.
