Senior System Application Engineer (f/m/div)*

Job description

Are you passionate about edge technology and security systems? Are you good in understanding and explaining complex technical details? Do you see yourself as costumer oriented? Then we have the perfect opportunity for you at Infineon in France. Our CSS department is hiring a System Application Engineer. Join us and become part of a high skilled team in a dynamic high-tech working environment.

As a systems application engineer, you will be at the forefront of future payment applications while connecting system understanding and application expertise. In collaboration with internal business partners (Sales, Business Development, Regional Marketing and Product Experts), you will proactively place Infineon solutions at our customers and provide technical support during a product launch (from concept to design in) and in customer relations.

In this role you will:

- Provide **technically support for Java Card based solutions** to secure design-ins /wins at our customers
- **Organize and conduct technical training for other FAEs**, customers and distribution partners
- **Provide regular feedback from the customer** to interfaces within the regional and global organization to improve our products and system offering
- Review technical documentation and **Go To Market material**
- Deliver **technical communication to partners in the Smart Card Ecosystem**

Profile

You are passionate about security and enthusiastic to make our networked world more secure. You are personally committed to the customer's concerns, awarding them a high priority and addressing them in our development projects. In addition, you have an organized and self-driven working style.

You are best equipped for this position if you have:

- A University degree in **Electrical Engineering or in a similar field**
- At least **3 of years** of working experience, ideally in **Application Engineering** or linked to **Payment Application**
- Knowledge of **Payment schemes and standards** (EMV, VISA, MC)
- Experience in **security and/or microcontrollers**

At a glance

Contact

Tiago.Novais@infineon.com

- Experience in **embedded Software, Java development for Smart Cards** or **JavaCard** personalization is a plus
- Fluent in **English**
- **Willingness to travel** (mainly EMEA)

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

* The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.
