

Digital Experience Platform (DXP) Expert as Senior Cloud Architect (f/m/div)*

Job description

Do you like to translate customer requirements into IT solutions? Are you passionate about delivering the best experience to Infineon customers? At Infineon, we are looking for a DXP Expert and Senior Cloud Architect to help shape our new Digital Experience Platform. If you want to be part of our digital transformation journey, like to bring in new ideas and want to develop them in a global environment, we are looking forward to your application! With this position, you will enter our "Technical Ladder" career path. The Technical Ladder is a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value.

In your new role you will:

- Support the **development** of a **reference architecture** for the cloud services and the content delivery infrastructure of the **Digital Experience Platform**
- **Analyze** and **challenge** business requirements with respect to the **cloud solutions** and **services** and the **content delivery** capabilities of the Digital Experience Platform
- Provide support to **ensure** that all cloud services and the content delivery infrastructure **meet all security, data protection and legal requirements**
- Be a **sparring partner** for internal and external **subject matter experts** and **implementation partners** in the area of cloud architecture for the Digital Experience Platform
- Analyze current and future **cloud architecture** and **content delivery needs** for the Digital Experience Platform
- **Consult** and **guide** internal customers, e.g. **Sales & Marketing** or **Communications**, on cloud solutions and content delivery topics of the Digital Experience Platform as part of the **digital transformation agenda**
- **Collaborate** and **coordinate** with domain experts, cloud platform experts, network experts, infrastructure experts, system experts, and software engineers **for best-in-class solutions**
- **Define** measures and **KPIs** to assess the as-is situation and provide support to identify and enable **continuous improvements**
- Be **owner** of the **documentation repository** and governance of any changes into the existing documentation

Talent Attraction Manager

As a true team player, you cooperate across boundaries, appreciate the contributions of other team members and respect their different attitudes and points of views. At the same time, you have a clear notion of how innovative IT solutions contribute to the commercial success of the company. In order to reach best results, you establish lasting relationships with your customers and listen actively to their thoughts and ideas. Furthermore, you know how to balance those requirements with technical or legal possibilities – and you are able to show them the added value of our available solutions.

You are best equipped for this task if you have:

- A **degree in Computer Science, Software Engineering, or similar field**
- **Proven experience of working with and delivering projects** involving **Adobe Experience Manager** and **Adobe Experience Cloud** products
- **At least 5 years of experience** as **Cloud Architect** for **Adobe Experience Manager** and **Adobe Experience Cloud** products
- Excellent knowledge of **cloud computing technologies, content delivery networks (CDN), enterprise level network topologies** and **network infrastructure**
- Know-how in **container technology, microservices** and **services meshes**
- Hands-on experience with developing, deploying and running applications on **Azure, AWS, or GCP**
- **Passion for security and privacy topics**
- Excellent **communication and analytical skills** as well as **strong interpersonal skills** to **interact with cross-functional global teams in order to thrive in a fast-paced environment**
- **Fluent English** language skills, **basic German** language skills

Benefits

- **Munich:**

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The **Information Technology** department has become an important business advisor for Infineon, converting business requirements into great IT solutions. It is responsible for provisioning hardware and software solutions at benchmark costs for all areas within Infineon reaching from office users to research & development, to frontend and backend production around the globe. More than 1.200 IT-colleagues work closely together with other business areas and external partners. They increase the efficiency of business processes offering more than just modern equipment, secure infrastructure and newest communication solutions.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
