

Senior Project Manager for Innovation and Predevelopment (f/m/div)*

Job description

Do you have a passion for new technologies, enjoy teamwork in a global organization as well as collaboration with experts and stakeholders from different organization and functions? Are you keen in exploring new paths for strategic topics of our wide-band-gap technologies? Then join our team, start action to shape your environment and take responsibility for embracing challenges!

In this role as professional project manager with a solid technical background and expertise, you will lead teams and actively manage projects within Technology Excellence driving predevelopment & innovation projects for various Infineon stakeholders.

In your new role you will:

- **Lead** complex predevelopment and innovation **projects** in wafer technology or package development
- **Execute** the projects in compliance with the agreed project plan, project targets and customer requirements
- **Develop** advanced and cost-efficient **solutions, process blocks or modules** for a wide range of applications with automotive, consumer and industrial industries
- **Define** and work-out **innovative solutions or concepts** for new processes blocks or interface and interactions within process modules
- **Communicate** within project team and to all relevant stakeholders in the project environment across all Infineon functions
- **Collaborate** with R&D partners in all divisions, Frontend & Backend unit process development, integration and innovation teams

Profile

You have the ability to recognize and use different areas of expertise and skills of team members and appreciate their contribution to the success of the project?

You are best equipped for this job if you:

- A **degree** in Physics Science, Material Science, Electrical / Microsystems Engineering or equivalent, preferable with a PhD
- At least **6 years working experience** in semiconductor technologies and minimum 4 years of professional experience in **Project Management**, ideally in technology or package development of semiconductors
