

## Director Software Processes (f/m/div)\*

### Job description

As Infineon continues the profitable growth path, we need to ensure that lean, efficient, harmonized business processes are executed in a digital environment. Teams of the Corporate Function Business Excellence enable Infineon's business owners to execute end-to-end business processes. As a Director Software Processes, you will be process owner and responsible for defining, implementing and managing the R&D Software development process that contributes to Infineon's overall R&D improvement activities on a global basis and drive the digital transformation.

In your new role you will:

- **Define, model and implement the business process for Software and Firmware development** at Infineon globally
- Be responsible to **translate business requirements into an optimized process model**
- **Manage and synchronize the interfaces with connected processes**, most importantly the **Hardware/Product/System development process**
- **Set up, lead and manage cross-functional and cross-divisional expert communities** needed to **deploy and improve a harmonized Software process including integration** of change requests
- **Drive the deployment of the Software process** with execution in the PLM system for R&D projects globally
- **Contribute to improve the efficiency and effectiveness of the Software development framework** within the context of the PLM@IFX project

### Profile

You take on new challenges without knowing the right path to an eventual solution in advance. You remain aware of the big picture even in complex situations and take decisions despite uncertain circumstances. You think and act in a cooperative way and clarify your areas of responsibility, coordinate your work with colleagues, and regularly share your insights with them. You work conscientiously on making things better, faster, and more efficient and support the team in striving for the goal of "zero-defect".

You are best equipped for this task if you have:

- **A degree in Electrical Engineering, Information Technology, Computer Science, Physics** or similar
- **At least 8 years of working experience in Software development** and a minimum of **5+ years' experience in management and modelling of business processes, process integration and harmonization**

### At a glance

Location:

Job ID: **349197**

Start date: **as soon as possible**

### Contact

**Sebastian Schmaus**

Talent Attraction Manager

- **Deep knowledge of process standards, audits and certifications**
- **Broad knowledge of different R&D processes, ideally practical experience in quality systems, methods, and tools**
- **Experience and ability to facilitate and lead interdisciplinary**, international and multi-cultural teams
- **Excellent analytical skills and strong communication and training skills**
- **Excellent English language and communication skills**, with German fluency considered a plus

## Why Us

**Part of your life. Part of tomorrow.**

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The **Business Excellence Department** contributes to Infineon's vision of a high-performance company. This goal is supported by the systematic use of quality management principles and tools in business management, with the goal of improving performance based on the principles of customer focus, stakeholder value, and process management.

*\* The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
