

## Student job: Test Development Engineer (f/m/div)\*

### Job description

Are you passionate about electronics and looking for the right opportunity to start your career in an international and dynamic environment? Then you might be the team player we are missing! Join our team in Provence as a Test Development Engineer working student and strengthen your core competencies in preparation for a thriving career.

As a Test Development Engineer working student, you will support our Test team, providing production test solutions and developing complex test solutions for new products. Therefore, you will be involved in the test concept and specification and the test package development and documentation.

In this new student job, you will:

- Support the **development of Automatic Test Equipment programs for Wafer Probe and Final Test**;
- **Work closely with Design, Application and Product Engineers, to understand the ATE development support required for the development of the product** in a timely & expeditious manner;
- Support the **design of the test hardware for new Automotive High Current IC products**;
- Support the **verification of the HW schematics and PCB layout**;
- **Review statistical data (including repeatability, correlation and tri-temp data)** prior to the release of the test solution to the manufacturing site.

### Profile

You are a highly innovative, creative and open-minded person with a great team spirit. You have good communication and organization skills, as well as the ability to search for solutions, learn and adapt to a fast-paced environment. Furthermore, your strong attention to detail and quality will be key to being successful in this role.

We believe you will be a great fit for this role if you:

- Are a bachelor's or a master's student of **Electronics**;
- Have **knowledge of lab equipment** (especially in oscilloscope, current probe, multi-meter and curve tracer)
- Have a background in programming languages, **e.g. C/C++ and VBA**
- Have experience with **PCB layout using CAD tools**
- Have knowledge about **power electronic and metrology background will be appreciated**
