

Senior Project Manager Chip Architecture (f/m/div)*

Job description

Do you enjoy working in an international environment and like to interact with different stakeholders? Handling different cross functional topics and priorities at the same time is your daily business, you love the variety of tasks and want to be part of a team for challenging topics? As Senior Project Manager Chip Architecture you ensure that the different parts fit together as a product. Therefore, you act as a link between development departments within the business unit Automotive Microcontroller. Do not miss this chance and apply now! The PJM Career is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role, you will:

- Be responsible for **project management of chip architecture's deliveries** for our internal customers
- Manage a **diverse project team** and **take ownership** to provide Chip Architecture related work products in time, at cost, with defined functionality and in committed quality
- **Align requirements** (functionality, quality, schedule, budget, others) with customer stakeholder
- Be in charge of **project planning** (resources, schedule, technical deliverables), **tracking** (schedule, cost) and **reporting**
- Handle **escalation management** and **customer stakeholder management**
- Take care of a close **cooperation** and **interaction** with all parties

This position is suitable for full- and part-time.

Profile

As Senior Project Manager Chip Architecture you remain aware of the big picture even in complex situations and take decisions despite uncertain circumstances. Furthermore, you are personally committed to the customer's concerns and award them a high priority. Lastly, you cooperate across boundaries and appreciate the contributions of other people.

You are best equipped for those tasks if you have:

- **A degree in computer science** or similar
- **At least 6 years experience in Chip design project Management** or similar
- **A certification in project management** (e.g. IPMA, PMI) is a plus
- **An ambitious attitude** and be able to **manage risks** in challenging environment

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality. Automotive Microcontroller: We make cars clean, safe and smart

As a leading automotive microcontroller vendor, the Infineon business line **Automotive Microcontroller** (ATV MC) offers the industry's most comprehensive vehicle microcontroller portfolio and complements it with software. We serve automotive key applications, such as powertrain, advanced driver assist, chassis, body, instrument cluster and infotainment. We also address high-performance dependable computing, real-time domain and zone control, smart sensing and affordable artificial intelligence (AI) applications enabling the next stages of automated driving as well as higher levels of car connectivity, digitalization and security.

Being at the core of this transformation, ATV MC contributes to shape the future of mobility enabling clean, safe and smart cars. So join us to create a better future together.
